

# 4G Router Camera

“Feel Smart & Secured”

A smart surveillance device equipped with a 4G M2M SIM slot that allows it to function both as a security camera and a portable Wi-Fi router. It provides internet connectivity through a mobile data network, making it ideal for public vehicles, rented spaces, or locations without fixed broadband. In addition to monitoring and recording activity at the installed location, it can also share its 4G connection as Wi-Fi for other devices.

## Features

- Intelligent Lighting; full color night vision
- AI human detection; efficient identification
- Built-in microphone/ speaker
- FHD resolution, clear and fine images
- Support various mobile monitoring; iPhone/ Android
- Ip66 waterproof and dustproof design; meet indoor and outdoor application scenarios

## Why 4G Router Camera?

### Dual Functionality – Camera + Wi-Fi Router

- Acts as both a high-quality surveillance camera and a portable Wi-Fi router via a 4G M2M SIM, eliminating the need for fixed broadband.

### Ideal for Remote or Mobile Locations

- Perfect for areas without internet access, such as public vehicles, temporary setups, rented spaces, or outdoor sites.

### Full-Color Night Vision with Intelligent Lighting

- Offers clear, full-color images even in low light, improving visibility and safety at night.

### AI Human Detection

- Advanced motion detection technology accurately identifies human presence, reducing false alarms and enhancing security efficiency.

### Two-Way Audio Communication

- Built-in microphone and speaker allow real-time communication with visitors or intruders through your mobile device.

### FHD Resolution

- Captures high-definition video, ensuring clear and detailed footage for monitoring and evidence.

### Mobile App Support

- Compatible with both iPhone and Android devices, enabling convenient remote monitoring anytime, anywhere.

### Rugged Outdoor Design – IP66 Rated

- Weatherproof and dustproof build allows reliable use in both indoor and outdoor environments.

### Flexible and Easy to Install

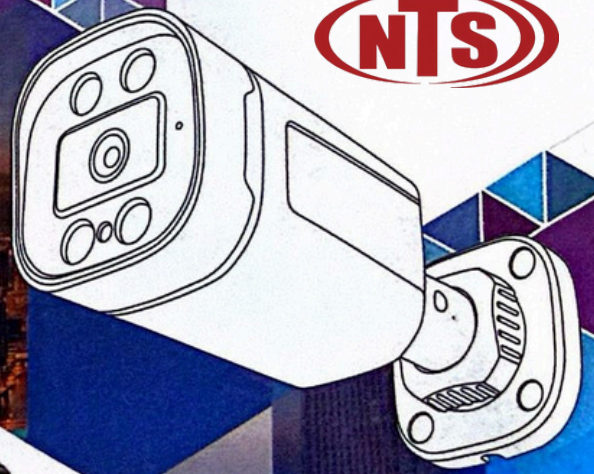

- No need for wired internet or complex setup, making it quick and easy to deploy wherever needed.
